

SOLR™ 4500

Special Operations Long Range Oxygen Supply 4,500 psig

The SOLR™ 4500 bailout bottle is the latest parachutist oxygen system designed by Airborne Systems. It is suitable for the most extreme HAHO / HALO missions when used with a parachutist oxygen mask. The 122 cu.in. oxygen bottle offers 50% more oxygen capacity than the SOLR™ 3000 for increased flight duration under canopy.

The reduced manifold size has been engineered for minimal size and maximum durability. For increased safety, the double action rotating oxygen toggle switch eliminates unintentional oxygen flow shut off.

The manifold maintenance intervals have been significantly increased (inspection every 30 months, service every 60 months).

The SOLR™ 4500 bailout bottle is compatible with legacy PHAOS and U.S. Army POM masks.

Key Features

- Lightweight
- 4,500 psig fill pressure
- 50% more oxygen capacity than SOLR™ 3000
- Brass pressure reducer, oxygen safe up to 4,500 psig (tested @ 5,395 psig)
- Low profile oxygen gauge, easily visible
- Easy maintenance (30 months inspection cycles, 60 months service cycles)
- Console Interface includes automatic shutoff feature when connected to the console
- Compatible with legacy PHAOS and U.S. Army POM masks
