

Airborne Systems is proud to offer a new member of the SOLR® Family of Oxygen Systems. We have designed a new console that allows personnel to check whether SOLR® Oxygen equipment is operational. It can be used in the field with no source of power and is able to perform all maintenance checks up to level two for your SOLR® masks and bottles.

The new SOLR® Portable Test Stand is extremely portable. It comes in a small Pelican case, and weighs just 25 pounds (11kg). The ruggedness of the Pelican case makes it a perfect solution for field testing, with no power needed at all.

The SOLR® Portable Test Stand is very easy to use. It takes just a few short minutes to perform both the SOLR®/OXCON bottle check, the SOLR® Mask check.

Key Features:

- Portable
- Light
- Rugged
- User-Friendly
- Deployable
- Plug and Play
- Self-contained (no external power needed)

SOLR® Portable Test Stand

Specifications

Part Number: 607200-0
