

# AGU

## Remote Control

The Remote Control Unit allows a user to remotely program the system and to monitor the status of systems while onboard the aircraft prior to drop.

After the MicroFly II® is dropped, the Remote Control Unit can be used to monitor the location and heading while in flight. If desired, an operator may override the Airborne Guidance Unit (AGU) and fly the system manually.

Remote capability:

- Ground control
- Air to Air by a jumper during combo drops

## Specifications

Part Number	836515-0
Weight	1.9 lb (.86kg) (including batteries)
Batteries	8 AA batteries
Dimensions	5.38 in x 2 in x 5.94 in (13.67 cm x 5.1 cm x 15.1 cm)
Hand switch	Optional
